The format of the proforma is explained as below:-

The column "packing charges per 100 kgs" shows the unit cost for the total packing. The second column shows the cost towards the lift-van and packing material and the third column towards labor. Thus the figure in the 1st column should be the corresponding fraction of the sum of 2nd and 3rd column. For the entitlement of 2600 kgs, the figure in the 1st column should be 1/26th of the sum of figures in 2nd and 3rd column. The same explanation holds good for other entitlements also.
